

Volunteer Applications for Disaster Response

Thank you for considering volunteering with Medical Teams Disaster Response! Whether you're a doctor, nurse, or administrative assistant, we're grateful for your interest. Your compassionate heart for others will have a positive impact on the lives of the people and communities we serve.

As a part of the application process, we request the following documents:

- Background check (updated every 3 years)
- Proof of a valid professional license (if applicable)
- Hepatitis B Vaccination Attestation.

Once the application is accepted, volunteers will be vetted for positions on our surge roster. The following is required to be a volunteer on the Disaster Response surge roster:

- Meets mandatory qualifications for a specific position on the response team.
- All day in person training.
- Completion of assigned online NIMS (National Incident Management System) education.
- Ability and desire to deploy within 48 hours of request for a maximum of 14 days, with the possibility to extend depending on the response.
- Ability to work in austere conditions.

We ask all our volunteers on the surge roster to have a thorough understanding of what it means to deploy during a disaster. Conditions during a disaster often involve minimal resources, challenging environments, and a lack of amenities, making daily life or activities more difficult and demanding. This requires resilience, adaptability, and the ability to function with limited means. These essential requirements help us maintain a high standard of professionalism in delivering health care services.

After completion of your volunteer application, our program staff will discuss suitable volunteer opportunities with you. Thank you for your interest, and we look forward to welcoming you to the team!

Turn helpless into hopeful and [apply now!](#)
